

Operator Training Required

Make sure you are trained to safely operate the following types of equipment:

- Scissor Lifts & Aerial Man Lifts
- All Forklifts, all types and models
- All of these require training to safely operate.

Contact your supervisor to be scheduled for a training session before attempting to operate.

If you are being asked or told to operate equipment that you are not trained for:

- Inform them you are not trained
- If they persist, do not operate it and report the incident to HR or EHS

Scissor Lifts

Aerial Man Lifts

All Forklifts
